Cure Max 50

Acrylic polymer-based, curing compound for concrete with sealing & dust-proofing properties

Description

Swadi Cure Max 50 is a single-component curing compound based on high-performance acrylic copolymers. Designed to reduce water loss from freshly placed concrete, it forms a tough, clear film that retains moisture for effective curing, while also offers sealing and surface dust-proofing benefits. It is UV-resistant, non-yellowing, and provides excellent durability on both horizontal and vertical concrete surfaces. Suitable for interior and exterior use.

Standard Compliance

Complies with standards ASTM C309 Type 1, Class A

Where to Use

- Freshly placed concrete slabs, pavements, and floors.
- Concrete roads, runways, and bridge decks.
- Precast concrete elements.
- Vertical concrete walls and columns.
- Industrial and commercial flooring.

Advantages

- Locking in internal moisture and allowing cement hydraton to proceed to its full potential
- Hydration of cement as long as possible
- Improves surface strength and durability
- Acts as a dust-proofer and light-duty sealer
- UV-resistant, non-yellowing, and long-lasting

Product Data

Chemical type	Modified acrylic polymer
Appearance	Milky white
Density	1.00 g/cc
Drying time	2 - 3 hours
Coverage	3 to 5 Sqm/ltr

Application Instructions

Exposed concrete slabs:

- Apply Swadi Cure Max 50 by spray as soon as the surface is free from visible surface water, usually 1–2 hours after placing. Application must be done before the concrete begins to dry out, ensuring effective moisture retention.

Formed / precast concrete:

- For vertical or precast elements, spray apply Swadi Cure max 50 immediately after formwork removal or demoulding. Where necessary, lightly dampen the concrete surface with clean water before application to improve film formation.

Spraying technique:

- Keep the spray nozzle about 450 mm from the surface.
- Move the nozzle steadily back and forth for uniform coverage.
- Maintain sufficient pump pressure to achieve a fine, even mist.

Shelf Life

Cure Max 50 has a shelf life of 12 months if kept in a dry store in unopened condition.

Packaging

5 kg, 20 kg & 200 kg packs.

Condition of Sale

Sold subject to the company's condition of sale which are available on request.

Storage and Handling Guidelines

The product should be stored as per national regulations in a cool, dry, and well-ventilated area, away from direct sunlight and extreme temperatures. Keep it out of reach of children. Ensure the container is tightly sealed when not in use. Handle with care to avoid contamination. Stir well before use and apply as per the recommended guidelines.

Environmental, Health, and Safety Information

For comprehensive information regarding the safe transportation, handling, storage, and disposal of this chemical product, please refer to the accompanying Safety Data Sheet (SDS). The SDS contains detailed information about physical properties, environmental impacts, toxicological hazards, and other safety-related factors. It is crucial to read the current SDS before using any product.
