Intra Cease IC+

High - Performance Superplasticizer for Cement - Based Construction Materials

Description

Swadi IC+ is a highly effective superplasticizer based on modified lignosulphate based product. The solution comes in pale yellow color, which is a powerful water reducing agent and imparts high mechanical strength to concrete, good flowability and non-sag mortar for all suitable applications.

Where to Use

1.) Pre - cast and pre-stressed concrete. 2.) Concrete admixture. 3.) Ready - mix concrete. 4.) Pre - cast and pre - stressed concrete. 5.) In areas of congested reinforcement, where higher workability is required. 6.) In reducing water contents for the sake of improving im - permeability and durability. 7.) Variety of concrete, e.g., marine, architectural, special concrete, pumpable etc.

Advantages

- Powerful water reducing agent - Reduced water content accelerates strength development and high compressive values.
- Free flow ensures high level of contact with load bearing area & also ensures complete fill without leaving any gaps.
- Non - sagging mortar.
- Enables high early strength & provides good workability.
- Lower shrinkage, lower porosity.

Product Data

Colour / appearance	Brownish red liquid
Specific gravity	1.18
Chloride content	Nil
Air entrainment	Negligible at normal dosage
Shelf life	IC + has a shelf life of 12 months

Dosage

- Dosage must be determined by trail mixes to meet specific requirements.
- 200 ml / 50 kg cement bag.

Effect of Dosage

- Over dosage can cause increase in retardation and segregation.
- Trail mixes must be carried in given dosage proportion to achieve the best properties from mixed Admix.

Packaging

IntraCease IC+ is supplied in 5 kg, 20 kg & 200 kg.

Condition of Sale

Sold subject to the Company's conditions of sale which are available on request.

Storage and Handling Guidelines

The product should be stored in accordance with national regulations. It is essential to keep it in a cool, well-ventilated area, away from heat, direct sunlight, sparks, and children. Please note that the product contains flammable solvents, so handle it with care. To ensure proper curing, mix the resin and hardener according to the specified ratio. Once mixed, use the solution within its pot life to avoid premature hardening.

Health, and Safety Information

SWADI Intra Cease IC+ is considered on-hazardous in normal usage; however, avoid contact with eyes or skin. Wear suitable protective dust mask, gloves and safety glasses. In case of contact with eyes, rinse for several minutes under running water.

For further information, please consult the Material Safety Data Sheet (MSDS).
